

Speeder Developer APIs v2

Authentication

Generate JWT token with email and password.
Pass parameter in post method

URL: https://speedercouriers.com/new_api/api/login

Request:

email: info@shipdlight.com
password: Speeder@123

Response:

```
{  
  "success": "0",  
  "token":  
  "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJ1c2VybmFtZSI6ImxluZm9Ac2hpcGRlbGlnaHQyY29tliwiZXhwIjozMDMDQyMjE2fQ.I1BNVK55GpckpCMOsovagUL1iXV2vIBVtWD4-M7BeMs",  
  "message": "Login Successfully."  
}
```

Response code:

Success:0 - login successful.

Success:1 -Invalid Credentials.

After this, Pass token as Bearer token for authentication.

API:create_booking

URL:https://speedercouriers.com/new_api/api/create_booking

Request:

```
from_name:test
from_city:test
from_phone:9999999999
from_pincode:560056
from_address:test abc,abc,test
from_state:abc
to_name:test
to_city:test
to_pincode:560056
to_state:abc
to_address:test abc,abc,test
item_cost:10
item_weight:1000
item_length:10
item_height:10
item_breadth:10
parcel_type:0
shipping_type:0
to_phone:9999999999
Item_qty:1
order_type:5
product_value:1000
```

Request code:

parcel_type:0=Normal Package,1=Contains Battery,2=Contain Glass Material

shipping_type:0=standard,1=express,2=schedule

order_type:3=cod,5=prepaid

item_cost: amount to be collected while delivery (for cod order)

product_value:actual cost of product

weight: in gram

Response:

```
{  
  "success": "0",  
  "data": true,  
  "message": "Order Inserted Successfully.",  
  "awb_no": 110000006776  
}
```

Response code:

Success:0 -Booking Created successfully.

Success:1 -Something went wrong.

API:status

URL:https://speedercouriers.com/new_api/api/status

Request:

awb: 110000006574

Response:

```
{
  "success": "0",
  "data": [
    {
      "status": "Placed",
      "description": "",
      "status_datetime": "2023-06-30 13:17:39"
    }
  ],
  "reason_data": null,
  "rto_awb": "",
  "is_rto": false,
  "main_awb": null,
  "message": ""
}
```

Response code:

Success:0 -Awb Order found.

Success:1 -Invalid awb.

rto_awb:awb no rto order if rto created

is_rto:true/false

main_awb:if entered awb no is rto awb than main_awb is original awb no

Data: status array

API:get_order

URL:https://speedercouriers.com/new_api/api/get_order

Request:

awb: 110000006574

Response:

```
{  
  "success": "0",

Api : https://speedercouriers.com/new_api/api/cancel_order

request: awb_no

response:{"success":"0","message":"Order Cancelled Successfully."}

The screenshot shows a REST client interface for a POST request to `https://speedercouriers.com/new_api/api/cancel_order`. The request body is a form-data type with a single parameter `awb_no` with the value `110000007174`. The response is a JSON object: `{"success":"0","message":"Order Cancelled Successfully."}`. The status is `200 OK` with a response time of `1270 ms` and a size of `456 B`.
